Advanced online live support

Advantages:

Save on upfront software costs when cafeteria POS is delivered as a service (SaaS)

Fully hosted means maintenance free software and hardware

Centralized operation

Advanced business efficiencies

Uptime and security meets the requirements of the financial industry and government

Save upfront on software and supports costs with cloud-based Point-of-Sale. There are no servers to buy or maintain. This easy to learn and simple to use program was designed specifically to meet the needs of K12 food services in the 21st century. A unified and modern approach to cafeteria management, combining cafeteria Point-of-Sale, free and reduced application processing, secure web-based payments, cafeteria attendance and parent notification. The system supports full integration with modern Student Information Systems. It's centralized and highly secure; the backend office is securely available anytime from any PC. Unprecedented online support includes remote monitoring of terminals for status and performance, trouble shooting and brush up training.
